## Skills Overview

### Website Design

I create visual interfaces that interact with users and brand organizations. My custom web designs set businesses apart from the competition and deliver a layout that is easy to use and harness the functionality. I have also provided web strategy consulting and planning, flash design, interactive user interfaces, and CSS design and layouts. I have the creative talent to appeal to your sense of style and the ability to turn your ideas into reality.

### Website Development

I specialize in developing standards-based websites, E-commerce, PHP/MySQL integration and rich internet applications. With my experience in LAMP, frameworks and source control, you can be confident that whatever your project demands, I can deliver.

### Online Marketing & SEO

With years of online and traditional marketing & advertising experience I have the ability to know what works and what fails. With the knowledge and extremely well performing campaigns, I can lead & direct a companies or clients needs for exceptional performing online campaigns, from performance, technological to visual needs.
